WHY SELL SHARK PRODUCTS?

Sharks around the world are under threat, primarily from finning for Chinese shark-fin soup. There are more than 70 million sharks killed per year for this market. The fishermen cut off the fin and throw the shark back in the water to die. We strongly object to this wanton waste of any species and encourage efforts to restrict this practice. Many of the shark products we sell come from sharks that were killed for other reasons: they are rarely killed for their teeth or jaws. The
