

3100-1 Drum Frames and Mini Drums

TOM TOM FRAMES

Made in
Pakistan

These 1/4" thick wooden tom tom frames are made from a wood similar to cedar. You can make your own tom toms using these frames and the Cow Rawhide Drum Covers shown in this catalog.

Please Note: We have had a couple of complaints from drum-makers about the frames releasing at the joints. The problem is caused by keeping the frame too wet for too long. We will replace frames that don't look right when you receive them, but once drum-makers start using them, we have no control over what they are doing to them and there is no guarantee after that.
