

5190-1 Animal Bacula

ASSORTED BACULA

Baculum is the Latin word for stick or staff. Bacula (the plural of baculum) are the bones in most mammals that stiffen the male's member on a full-time basis. They are often treated as fertility symbols or good luck charms.

These bacula are professionally cleaned. They make great earrings, martini sticks, or tooth picks when sharpened for your favorite lawyer or Mountain Man or Woman.

The small raccoon bacula are 2 3/4" to 4" long. The large raccoon bacula are 4" to 4 1/2" long. The black raccoon bacula are dyed pitch black in our warehouse using India ink.

All the bacula are measured with a straight ruler from tip to tip.

Product of the USA
